That this House believes that access to essential healthcare is a universal human right; regrets the continued existence of structural, institutional and systemic barriers in accessing NHS care experienced by undocumented migrants and those awaiting determination of their asylum, visa and immigration applications; considers that an effective public health response to the covid-19 crisis requires that the most vulnerable can afford to access food, healthcare, and self-isolate where necessary; understands that some of the most vulnerable people in society will not access vaccination against the virus, since to disclose their identity to the authorities would risk their arrest, detention and deportation; fears that without urgent Government intervention this will lead to further avoidable premature deaths, especially in the African, Asian and Minority Ethnic population; and therefore calls on the Home Office to grant everyone currently in the UK at this time who are undocumented migrants and those awaiting determination of their asylum, visa and immigration applications indefinite leave to remain, and to be eligible in due course to receive the covid-19 vaccination.

That this House recognises the enormous contribution to Britain of the former Hong Kong armed forces who loyally served this country from 1857 until 1997; it acknowledges that these men and their ancestors greatly served UK commitments in South East Asia, stood shoulder-to-shoulder with Britain throughout two world wars, serving in France, as well as Burma, Korea, Malaya, Singapore,

That this House recognises the challenge to public health caused by roadside air pollution, in particular, fine and ultra-fine combustion generated particles; urges the Government to look to how other countries mitigate harmful levels of air pollution that are prevalent on roads and highways for example the current Roadworthiness Directive 2014/45/EU and to be guided by effective, evidence-based policies; further recognises that the current MOT tests do not identify vehicles which emit dangerous particulate emissions levels and lack the appropriate sensing technology for harmful levels of fine and ultra-fine particulate matter; further urges to the Government to take steps to enshrine principles of minimising roadside air quality into MOT tests by introducing improved sensing technology which would identify high-emitting vehicles; urges the Department of Transport to take steps to introduce an efficiency element in the diesel particulate matter section of the MOT based on particulate mass or number metrics; and supports the work of the Dutch Government and the Dutch Parliament in incorporating IENW/BSK-2020/125046 into vehicles' Period Technical Inspection tests by law.

That this House celebrates Real Bread Week and the recent upsurge in interest in traditional baking methods; welcomes the role of many small and medium sized bakeries across the UK in providing quality and choice for their customers; regrets that commercial pressures have too often led to the inclusion of so-called processing aids and other additives in mass-produced baked goods; further regrets that pressure exerted by retailers on suppliers has seen a general deskilling of the workforce and race to the bottom in the pay and conditions of those employed in the baking industry; is concerned about the implications of automation in further limiting the volume and quality of jobs

in the sector; believes that consumers and workers alike benefit from the production methods in the baking of Real Bread, made with healthy, natural ingredients; and therefore calls on the UK government to introduce a new Honest Crust Act to ensure clear and accurate labelling of baked products, and to invest in the ability of businesses of all sizes to further develop skills and well-paid employment opportunities in the sector.

That this House believes the Green Homes Grant to upgrade 600,000 homes and support 100,000 jobs is in need of fundamental reform; is concerned that as of 8 February 2021 just 22,165 vouchers had been issued to customers despite enormous demand, that any underspend of the £2 billion invested until March 2021 will not be rolled over to 2021-22, and that delays in issuing vouchers has led to financial difficulties and redundancies for companies, with one third of those surveyed reporting that delays in payment were threatening their business's viability; welcomes the Environmental Audit Committee's Growing Back Better report and the Committee's survey demonstrating that many homeowners struggled to find registered contractors and that 86 per cent had a poor experience with the application process; notes the commitment in the 2019 Conservative Party Manifesto to invest £9.2 billion in improving the energy efficiency of homes and public buildings; further notes that the Climate Change Committee's Balanced Net Zero Pathway requires £55 billion of investment in home energy efficiency by 2050; calls on the Government to

work with stakeholders to improve the Green Homes Grant, ensure installers are urgently paid for delivered work, strip US consultancy ICF of their contract, and commit to a Green Jobs Guarantee including long-term funding for an ambitious multi-year investment in home retrofits; and urges the Government to reverse the current tax incentive which operates in favour of new build and against retrofit.

That this House recognises the importance of creating a national Assistive Product List (APL) to ensure that older people and people with visible and non-visible disabilities have equitable access to the essential assistive products they need to achieve a good quality of life; highlights that 50 major UK assistive technology specialist organisations including the British Dyslexia Association, Leonard Cheshire, SCOPE, the Royal National Institute for Deaf people, the Royal National Institute of Blind people, the British Healthcare Trades Association, Hft, MENCAP and the British Association of Prosthetists and Orthotists have already joined together to create the first UK APL in recognition of the value of this World Health Organisation initiative that is based on the impactful Essential Medicines List devised in 1977; commends the British Assistive Technology Association for leading the initiative on creating that list and draws attention to the work that that large coalition of stakeholders has been doing over several months to create a wide-ranging initial list of assistive products from hearing aids to crutches, wheelchairs and digital assistive products, in preparation for a Government-backed survey and consultation exercise; and joins with that unified community to call on the Government to include a national APL survey and a national consultation exercise to create a UK Essential Assistive Products List as part of any new disability and ageing strategy, to help address the gaps and barriers to accessing assistive technology that currently hinders the quality of life of so many.

That this House is appalled by the Government's Immigration Rules which came into effect on 1 December 2020 that make rough sleeping grounds for refusing or cancelling someone's right to remain in the UK; fears that those new immigration rules will push people further away from seeking support and will also make people more vulnerable to exploitation; is aware that the Government has indicated that the rough sleeping grounds for cancelling or refusing someone's permission to be in the UK will only be used sparingly, yet is concerned that that is only a rhetorical commitment and that the scope of the grounds to refuse or cancel someone's right to remain in the UK as set out in the Immigration Rules is very broad; is alarmed that those rules do not include protections for people who are illegally evicted from private properties; recognises that specialist organisations working in homelessness, including Crisis, have expressed concern that that will make the work of outreach teams trying to support people sleeping rough much harder, as people fear that engaging with services could put them at risk of being detained and deported; and urges the Government to scrap that cruel policy and instead work towards eradicating the scourge of rough sleeping in the UK for all people, regardless of their immigration status.
